

Copy the effect mods!

1. Unzip LBX ZenoMod.rar to your desktop.
Now open the unzipped folder LBX ZenoMod and copy the folder "LBX Plugins" into your Reaper Effects directory.
2. On OSX: /Library/Application Support/REAPER/Effects
On Windows: %AppData%\Roaming\REAPER\Effects

Import the strips into LBX

1. Right-click on "Master" to switch to Dynamic Mode.
2. Press 0 (zero) on your keyboard to open the strip browser and right-click on the first left button (in this example "Favs"). Select "Batch Import Folder Of Share Strips".
3. Select the folder "JS Dynamics ZenoMOD" and press "OK".

Success!

The strips are now successfully imported!

Congratulations!
